Carpet tiles are a popular product in offices:

Bonar Floors supplied Tessera carpet tiles for the refurbished Oxfordshire head office of law firm BrookStreet des Roches LLP. Butler Cox, a member of the **CFA** was the flooring contractor on the project.

In the reception Alignment Horizon carpet tiles on SOFTbac were laid in broadloom style within a marble border. Alignment was also used in the meeting rooms. The multi-height loop carpet tiles were combined with

intersecting random blocks of cut pile. Optimum Create loop pile tiles were laid in the open plan main office area. Made in 100% solution dyed Antron yarn, the tiles are designed to maintain their appearance and withstand wheeled traffic

such as castor chairs. Alignment also in 100% solution dyed Antron yarn carries a 10 year guarantee, extended to 15 years if on SOFTbac secondary backing. www.bonarfloors.com

Burmatex has launched the seven-product Evolve high-end specification collection for use in design-centric offices, including Anyway Urban, Anyway Skyline, Scan, Mood, Fuse, Shift and Axis. Evolve's colours are 'inspired by city architecture and urban culture'.

Anyway Urban is tonally linear with bright strips of highlights. It can be fitted broadloom, ashlar, tessellated, or random lay, allowing for flexibility. Anyway Skyline has similar flexibility.

Evolve Scan, Mood and Fuse are, respectively, a linear loop pile, a tonal pinpoint cut pile; and a metallic textured loop.

Evolve Shift, Scan and Axis are three directional products in 'contemporary' colours. Shift is a cut pile stripe, Scan a linear loop pile and Axis a solid cut pile. www.burmatex.co.uk

CFS Carpets broadloom and carpet tiles have been installed in thousands of UK offices for over a quarter of a century, says the company. Several CFS tile ranges are now available on Envirolite, a 100% hydrocarbon backing said to be totally recyclable and contain no plasticisers and solvents. Tiles on Envirolite backing are claimed to be easy to cut, lighter than traditional tiles and extremely flexible, even at low temperatures.

Targeting the office sector, CFS recently introduced Graduation, a 100% Antron nylon heavy contract carpet tile and broadloom with a high level of anti-static protection, available in 12 colourways.

Desso provided broadloom and carpet tiles for the recently built West Lindsey District Council offices in Gainsborough, near Lincoln. The office accommodates 250 staff and the council's meeting
